

LAURETTA'S PUZZLE SOLUTION - ARM'S LENGTH

The cryptic list below can be deciphered to yield various real or fictional characters, all of which have a notable companion with a bird's name. Each of those sixteen birds represents a letter in the code. If all avian companions are crossed out of the 26-letter tableau on the last page, the remaining letters spell ARM'S LENGTH.

HANNIBAL LECTER	(Clarice) STARLING	I
