

## CAT'S REVENGE SOLUTION – PARTY

Each image clues a film (clued in chronological order) with a different animal's name in the title, but substituting "cat" for the actual animal. The twelve original animals are all the members of the Chinese zodiac (legend has it that cats are aloof because they were cheated out of their place in the zodiac, the elevation referred to in the flavortext). For each pair of actors given, one was in one of the clued films. The other portrayed a cat in a different film. Using the movie rating attached to each partner's clued film to index into the cat character's name, then arranging in zodiac order, spells the message ANSWER'S PARTY.
