

THE MILL GRÖTTI SOLUTION - TOXIC MASS-SALINITY

Wheels 1-5 can be filled with information revealed by solving puzzles (the information is redundant, and distributed in such a way that solving any ten puzzles -- but no fewer -- provides complete information.

For each puzzle answer, align the wheels so that the answer reads across the IN axis, interspersing numerals as needed to make a 10-character string. In such a configuration, the OUT axis will yield a 10-letter string. This string will form a phrase related to the puzzle answer if the solver inserts a bit of salt (the letters NACL, in order though not necessarily consecutively) plus one additional letter, which is unique to each puzzle answer. Associate each added letter with any numbers added to the puzzle answer input, and arrange them 1-17 to spell the answer TOXIC MASS-SALINITY.

IN (PUZZLE ANSWER + NUMBERS)	OUT	SALTY PHRASE	LETTER
A[9]R[8]TIC[10]LE	EWPPEROUMN	[N]EW[S]P[A]PER[C]O[L]UMN	S
BLUESRO[6]CK	JUPIJKFASH	JU[M]PI[N]J[AC]KF[L]ASH	M
BO[3]OTYCALL	ETFLINDHIL	[N]ETFLI[X][A]ND[C]HIL[L]	X
CHE[11]CKU[7]PS	NULPHYSIAS	[A][N]NU[A]LPHYSI[C]A[L]S	A
DIG[17]ESTION	ALIMETRANA	ALIME[N]T[A]R[Y][C]ANA[L]	Y
HAMSTR[12]ING	VOUTRYMUSE	VO[L]U[N]T[A]RYMUS[CL]E	L
